Employment

Mercari US

Sept. 2022 to Oct. 2022

Palo Alto CA

• Helped build out search team's new metrics table in Dataform to power dashboards and assess experiment results.

· Analyzed price elasticity between highest GMV/most searched for category groups to understand buyers' demand change in relation to item price

Mercari US

Palo Alto, CA Aug. 2021 to Aug. 2022

• Created Search RFM segmentation to personalize search and increase GMV.

• Investigated query chaining to understand search engine performance as well as searchers' persistence for casual and power users' high value purchases.

- Performed user journey analysis across web to provide insights on platform's highest touch points for ML efforts to converge on.
- Analyzed navigation vs search activity to improve our UI to cover all our users' intent to drive north star metrics.
- Built statistical significance framework for experimentation at scale to add criteria for product roll out.

Forethought

San Francisco, CA July 2020 to Sept. 2020

On the Customer Experience team, leading all technical requirements and touching all aspects of the business: Engineering, Product, Sales and **Customer Success**

Implemented: State-of-the-art NLP models to help clients be geniuses at their job

Involved: Data Engineering, Data Science, Machine Learning/Artificial Intelligence, Business Intelligence -- owning whole data pipeline Post-Sale

- Queried MongoDB to create customer business rules.
- Designed Al Training datasets to feed into XLNet and BERT models using Jupyter Python notebooks.
- Analyzed trained models' performance to deploy best automated NLU models for clients
- Verified live models' predictions were successful via API calls to clients' Salesforce Help Desks.
- Reduced client's SPAM from 64% to less than 1%.
- $\bullet \ \ \text{Helped save client} > \$20,\!000 \ \text{in human labor cost from Customer Support Agents manually labeling tickets}.$
- Completed data analysis that contributed to signing of >\$400,000 deal with Instacart.

Immuno Concepts

ullet Built linear regression models to determine whether or not products were drifting from quality. • Tracked trends and outliers to make manufacturing recommendations to management to create efficiencies and increase profit margins.

• Created product performance reports to drive key business investments for following quarter.

University of California, Davis

Davis, CA

Sacramento, CA

July 2010 to Apr. 2019

Jan. 2005 to Dec. 2008

- Through repeated experimentation explored sigma 70 subunit architecture to characterize macromolecular complexes involved in transcription of growth-related genes
- · Narrowed down which protein chain substitution in antibody-derived proteins fit best with research aims in pre-targeting radioimmunotherapy for Non-Hodgkin's Lymphoma.

Projects

Deployed Web App for Business Stakeholder

lune 2021 to lune 2021

June 2021 to J

Took a business stakeholder's question, translated it into a data question, performed ETL and created a web app with visualizations and analytic conclusion. Deployed web app with non-technical language using Streamlit's Sharing feature.

Modern Analytics Data Stack Built from Scratch Feb. 2021 to Feb. 2021

data pipeline to perform ELT and BI visualization laver. Stack included open source: PostgreSOL DB, Meltano, dbt and Superset.

Time Series Forecasting on Uber Eats' Vendors Utilized 7.911 samples of date-stamped data and predicted which vendors were worth continuing business with based on ROI. Dec. 2018 to Dec. 2018

Trended each vendors' data with Facebook's Prophet. Trends performed over a span of 15 months. Data further broken down into weekly and daily trends. Reshorizon producing 0.01 - 0.03 RMSE.

Postmates New Market Analysis with Geospatial Heatmaps Analyzed 3-sided market to explore contributors to conversion and churn, used heatmaps to visualize supply and demand, determined health of market and addressed data integrity issu

Mar. 2019 to Mar. 2019

July 2019 to July 2019

Medicare Prescription Drugs Analysis Analyzed 25,209,130 samples of Medicare Part D Prescription use to determine how geography correlates with provider density, provider specialties and drug costs.

Plotly and Seaborn used to visualize number of providers across states, to geocode provider specialties and to examine differing degrees of drug cost variance across the U.S.

Publication

Feb. 2009 to Apr. 2009

American Chemical Society Publications Mapping Protein-Protein Interactions by Localized Oxidation: Consequences of the Reach of Hydroxyl Radical Results provided fundamental information for interpreting protein foot-printing experiments in other systems

Volunteering

CoronaWhy Machine Learning Engineer

Apr. 2020 to June 2020

Helped to fight against Coronavirus

CoronaWhy is a globally distributed, volunteer-powered research organization of 1000+ members. They are using DS and AI to assist the medical community and policy makers answer key questions related to COVID-19. It's supported by Google, Amazon, NASA and other companies

I was embedded within the Vaccine/Therapeutics Task team, helping the Paper Study Classification group build baseline models to filter papers based on study design
